Project Title: Lana Del Rey Website

My project involves creating a multi-paged website dedicated to the life and musical career of the singer-songwriter Lana Del Rey. Unlike the continuous scroll structure of Wikipedia, this website will feature standard site navigation, enhancing the user's browsing experience. The primary focus will be on visually engaging content, complemented by the possibility of including embedded songs from the albums discussed on each page.

Possible Page Structure

- Home page - This will include a broad overview of who Lana del Rey is, what albums she has created, and her accolades
- Early life/career beginnings
- Born to Die / Paradise
- Ultraviolence
- Honeymoon
- Lust for Life / NFR
- Chemtrails Over the Country Club / Blue Banisters
- Did you know that There's a Tunnel Under Ocean Blvd

I will gather information from a variety of sources, including Wikipedia and media outlets that feature Lana Del Rey's images. During the project's development, I may choose to consolidate certain pages, although my preference is to keep the content dedicated to no more than two albums per page.
